Additional Answers to Questions for the Parasite Cleanse Workshop

If our hydric cloric acid in our stomach is at a good level we shouldn't really deal with parasites?
Correct.

To make your body more alkaline I heard too use Mag Phos. Would that be Mag Phos 6 x or c and in hot water to absorb? And how often? I imagine to test your Ph with a Ph strip?
Magnesium is definitely helpful. And yes, you can test.
The Sulphur and Calc Carb work to root our hereditary disposition for those with defective digestion. Which means that the body's ph will naturally balance.

Now with this protocol will you experience any die off like you may with herbs?
You shouldn't. If you follow the directions and take with the DE, it should be very gentle. Because the parasites seem to just disappear, rather than die and cause the difficult die off conditions.

I've heard you shouldn't have DE alongside food because it pulls nutrients. Can you speak to that?
DE is rich in Silica and it could affect assimilation slightly, due to a possible speeding up digestion. But I don't see how it would pull away nutrients.

can we mix the DE directly in our dog's food? (food grade DE of course)
Yes. I would wet it slightly to avoid the dog inhaling the dry powder.

my mom swears she has them coming out of her eyes...would there be something to apply topically or would the remedies help with this?
The remedies would help. I would also encourage you to look in a repertory to see if there is a Rubric in the Mind section: Delusion; worms coming from the eyes.

If you have livestock and dogs and dig in a garden you probably have parasites right?
Yep! Not to say that your body isn't healthy enough to rid itself of the parasites when they try to establish….the above remedies and DE, just make it an easier process!

Can you do parasite cleanse if one is doing a pneumonia cleanup meaning using the pneumonia nosodes (cease protocol)?
Ask your homeopath. If not under direction…. It should be ok to take simultaneously…might even help the protocol along.

What about restlessness in sleep early in the evening? My one year old is incredibly restless in her sleep from 10pm to 1am. Could that be an indication? Absolutely.

Is one pellet a dose from your kit?
I always say 1-3 pellets, just so that you don't spend too much time with the bottle being open…tap, if one comes out? Great. That is a dose.

Is the CinaMariMC remedy - is that the correct Cina 200 you are talking about?
Yes. Cina maritima is the "understood" Cina. Any other Cina is always indicated.

How could I deworm my cats? will this work for cats lung worm?
I actually like to use the #3 and #16 remedies in the cats water. I use one first for 1-2 weeks, then switch and then the other for 1 -2 weeks. You can also add DE to the water for good measure and a nice smooth coat!

So if the whole family is doing the cleanse, should the dog do it as well? Do you do this cleanse with the dogs at the same time? How much DE for dogs?
I actually like to use the #3 and #16 remedies in the dog's water. I use one first for 1-2 weeks, then switch and then the other for 1 -2 weeks. You can also add DE to the water for good measure and a nice smooth coat!

I have the remedies in liquid. should I have the pump top for 1 pump per dose or the dropper top (then how many drops?)
You can just put a few drops in a glass of water, stir and give everyone a ¼ - 1 tsp dose.

What would you use should there be a constipation reaction from DE? I've experienced that as well as my dog so I'm a little scared to start. Need to be ready for a repeat reaction.
Taking the remedies should make the difference. For the dog I would recommend tha #3 and #16. If constipation does set in; maybe begin taking Magnesium before bed (follow directions on bottle) My favorite is Rudy's Magnesium that we sell in our store.

is it ok to do the protocol in 30c potency for sensitive people?
I would recommend taking the 200c's in 10th dilution. (directions are in our resource for the 4th dilution…just keep going to the 10th)

I have a friend that I think would have been very interested in this. Is there any way that she could get access to the 2 week free trial on homeopathy for mommies so that she can watch the replay?
Yes! You can send her the link to join here through the end of this month: homeopathyformommies.com/trial

If you are taking hypericum 200 and arsenicum 200 but stop today can you start this protocol in a day or two?
Is the issue resolved that you've been taking the remedies for? If yes. Then it should be fine.

Any cautions for this protocol in a child with "GERD" bile reflux symptoms?
Maybe start with ¼-½ tsp of DE until you decide if there is going to be repercussions. Also, give the remedies extra time to work. I believe that you will be very pleased with the child's results.

What about heavy metals? I've been told that parasites can't truly go away if you have heavy metals in your body.
Yes, they do like heavy metals. But they still cannot survive if the digestive system is balanced. I always ask Cancer patients to begin any treatment with A Parasite Cleanse AND a Heavy Metal Cleanse.

then would you address fungal infections, we use homeopathy?
That is also a loaded question! I would do the Parasite cleanse first, then address the Fungal issues.

Do you take on new patients? Or how do we find someone who can help diagnose and open a case for us locally to our area?
Sue currently has a full case load but when she does take cases it is from her membership. You can access homeopaths that Sue recommends here: https://homeopathyformommies.com/recommended-homeopaths

You recommend waiting until 7 years to really start the protocol. My 2 year old has pretty bad constipation. But constipation also worries me with cleanses as from what I understand constipation means the pathways are closed. Would this be an issue?
Oh! You can do the Parasite Cleanse with a child….it's just that until the child is 7, the body isn't mature enough to hold gastric balance.

If one doesn't have access to DE and just the homeopathic remedies, would the remedies be given on the same schedule or only during full moon?
You can do this cleanse anytime. The full moon is when the parasite are most active and possibly easier to expel.

if out of moldy environment, would you benefit?
Yes. I think that most everyone will have benefits for doing this protocol. Especially with our nutrient poor diets today.

My husband has chronic toenail fungus that has not responded to any intervention, allopathic, herbal, or homeopathic. Are worms a possibility?
Yes, possibly. But antibiotics are also to blame, especially tetracycline. (even if it was used in the past. If this be the case, I would suggest using CEASE to clean up the system)

If someone is taking other remedies, can they just do DE then to be on the safe side?
Yes, DE can be taken at any time.

so no worry about vomiting or diarrhea with the elderly or anyone?
I've not experienced this with anyone that I've worked with.

Is there an expiration date for the 14-day free trial for Membership?
The trial is available through the end of March for registered attendees.
